## Variety description

### Fine premium tomato

The smaller fruit size (10 to 13 grams) is a distinguishing feature of this round cherry vine tomato. The great taste and crunchy bite, combined with the deep red colour and flat trusses, make it a popular tomato for the premium segment. The fruits are strong and do not split easily. The slightly generative, balanced and uniform crop is suitable for lit cultivation and has a standard resistance to leaf mold. Moreover, the crop is very dynamic as it is suitable for both loose and truss harvesting.

## Variety information

**Introduction no.**  
**72-008 RZ**

**Highly Resistant**  
**ToMV:0-2/Ff:A-E/  
Fol:0,1/Si**  
Tomato Mosaic, Leaf Mold, Fusarium Wilt, Silvering

**Intermediate Resistant**
